

ZSR Patlayıcı A.Ş.

ENVIRONMENTAL POLICY

As ZSR Patlayıcı A.Ş., we embrace the fundamental principle of conducting our ammunition and explosives production processes with an environmentally conscious, responsible, and sustainable approach. Accordingly, we are dedicated to executing our activities in compliance with the ISO 14001 Environmental Management System standard, guided by the following principles:

1. By actively assessing our environmental impacts, we strive to mitigate potential risks.
2. To ensure complete adherence to environmental legislation, national and international regulations, and the ethical standards applicable in all countries where we operate,
3. To elevate environmental standards to international benchmarks in our production processes and all our projects, while continuously seeking and implementing improved practices.
4. To advance environmental protection through the development of systematic and technological solutions aimed at preventing pollution at its source.
5. To minimize our environmental impact by enhancing the efficiency of energy, water, and natural resource utilization,
6. To enhance our employees' awareness of environmental issues and promote their active engagement,
7. By fostering a culture of continuous improvement, we strive to enhance our environmental management system and overall environmental performance.
8. We regard the fight against climate change as a fundamental aspect of our environmental responsibility and, in this context, we emphasize practices that will minimize our water and carbon footprints.
9. To foster open, transparent, and sustainable communication regarding environmental issues with all our stakeholders,
10. To adhere to the principle of a cleaner environment, a healthier society, and a sustainable future, while fully meeting the requirements of this principle.
11. To guarantee the safe management of hazardous materials, wastes, and by-products in a controlled manner and in compliance with regulations, thereby protecting the environment and human health.
12. We will prioritize collaboration with suppliers and contractors who adhere to our environmental management system.

All employees are accountable for adhering to environmental protection protocols and exhibiting environmental awareness.

As ZSR Explosives Inc., we will persist in conducting our operations in alignment with these principles to uphold our objective of being one of the leading companies in our nation regarding environmental management and sustainability practices.

Every environmental risk is preventable and every process can be improved. Our goal is ZERO accidents!
